

Mobile Microloans and Banking App for Fintech Startup

PROJECT DETAILS

 Mobile App Development

 Apr. 2020 - Jun. 2021

 \$50,000 to \$199,999

“

"They add great value by understanding business requirements and helping think through specs prior to delivery."

PROJECT SUMMARY

To recover from the damage caused by the pandemic, a fintech startup had hired Mass Software Solutions Private Limited to develop a microloan and banking app. Technologies used include Angular, MySQL, and more.

PROJECT FEEDBACK

Mass Software Solutions Private Limited has launched the project and has received 1000 downloads within two months. They have been described as organized, having excellent communication and management. They have also been regarded for delivering their products in a timely fashion.

The Client

Please describe your company and your position there.

I am a founder of a FinTech startup.

The Challenge

For what projects/services did your company hire Mass Software Solutions Private Limited, and what were your goals?

To do core development work on our product, as we started from zero and launched over the last year, during the pandemic.

CLIENT RATING

Quality: 4.5

Schedule: 5.0

Cost: 3.5

Would Refer: 5.0

The Approach

How did you select this vendor and what were the deciding factors?

I liked their professional presentation, history of building similar apps, ability to answer questions and think outside the box.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

To start from zero and help spec and develop a microloan and banking app to be used in the Brazilian market. Utilized Angular, Node JS, Python, Mysql, and AWS - among other technologies.

How many resources from the vendor's team worked with you, and what were their positions?

Assigned Project Manager who worked with us throughout - ontime and professional. Head of dev team also had project and product overview, was readily available to discuss and help solve problems. Other technical resources as required for specific deliverables.

The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

Delivered on time as desired and discussed. Within 2 months have over 1000 downloads and a growing funnel of users in production.

Describe their project management style, including communication tools and timeliness.

Generally organized in sprints via Jira. Excellent communication and overall management.

What did you find most impressive or unique about this company?

The delivered quality products on time. They add great value by understanding business requirements and helping think through specs prior to delivery.

Are there any areas for improvement or something they could have done differently?

Nothing immediate or sizeable comes to mind. Would happily work with them on other projects.
